EDUCATION

Tulane University, Newcomb-Tulane College — New Orleans, LA
Bachelor of Science, Computer Science and Economics — May 2027
GPA: 4.0, Major GPA: 4.0

Tulane University, School of Liberal Arts — New Orleans, LA
Master of Arts, Policy Economics — May 2028

Honors: Dean's List (all semesters), College Scholars
Relevant Coursework: Data Science, AI Engineering, Econometrics, Linear Algebra, Artificial Intelligence, Computer Systems, Algorithms, Game Theory, Discrimination and Data Research, Intermediate Microeconomics

WORK EXPERIENCE

Excelsior University — Albany, NY
Summer Technical Product Management Associate — May 2026 - August 2026

- Led product management for campus-wide AI initiatives with estimated annual impact of $1M+, aligning dozens of university stakeholders to ensure seamless cross-functional delivery.
- Leveraged AWS, Docker, and Salesforce technologies to implement RAG, optimizing data retrieval for agentic AI.
- Conducted business impact analysis to forecast revenue opportunities and justify funding for AI projects and presented data to executive council through concise PowerPoint presentations.

Excelsior University — Albany, NY
Summer Data Science Associate — May 2025 - August 2025

- Developed machine learning models with big data using Pandas, NumPy, XGBoost, and LightGBM to predict student success and withdrawal risk, and wrote documentation for future use.
- Performed data science lifecycle, from exploratory data analysis and data visualization through data preprocessing and model integration, engineering features based on 2,000,000 data points to provide high interpretability to stakeholders.
- Translated complex ML model outputs into actionable retention strategies for university administration, bridging the gap between technical data and non-technical stakeholders, aimed at increasing retention by 5%.

PokerU — New Orleans, LA
Co-Founder & Lead Software Engineer — August 2024 - May 2025

- Developed a React Native/Expo app for organizing poker games and statistics with Django backend integration, using AWS cloud computing and focusing on clean user experience.
- Spearheaded the end-to-end product lifecycle, transforming a raw concept into a deployed App Store application by driving the daily milestones for a team of 5.

Tulane University — New Orleans, LA
Course Assistant for Intro to Computer Science II — January 2026 - Present

- Serve as an undergraduate teaching assistant for Tulane's introductory course on object-oriented programming.
- Mentor 30+ students weekly, breaking down complex OOP problems and grading exams with in-depth feedback.

Connolly Alexander Institute for Data Science — New Orleans, LA
AI Innovation Intern — August 2026 - Present

- Work with partners to develop RAG solutions for researchers and underprivileged communities.
- Collect requirements, develop, ensure compliance, and deploy AI-powered apps in Microsoft Azure.

SKILLS

- Technical: Python, JavaScript, SQL Server, React Native, Django, C++, Java, C, STATA, API, LLM.
- Soft Skills: Collaboration, Stakeholder Management, Communication, Problem Solving, Action-Oriented
- Tools: Adobe Premiere Pro, Adobe Photoshop, Microsoft Suite, Gemini, ChatGPT, Claude, Git, Salesforce.

PROJECTS

Low-Cost Carrier Flight Opportunity Analysis — New Orleans, LA
Data Science Project — January 2026 – May 2026

- Analyzing commercial flight data from the Bureau of Transportation Statistics to gain insight into what makes a profitable flight route and how low-cost carriers may be able to connect non-hub airports to fill gaps in the market.

Data Center Development and Discrimination Paper — New Orleans, LA
Economic Research Project — August 2026 – Present

- Analyze the placement and environmental impact of data centers with respect to how they affect underprivileged communities and write a research paper sharing the findings of regression analysis.
